Data format

We accept the following data formats:
PDF, EPS, TIFF, JPG.

Please observe the following points:

1. Embed all text or convert it into streams.
2. Use only CMYK colours.
3. With pixel-oriented data formats, we require a resolution of at least 250 dpi.
4. Do not compress JPG files too strongly, or this will lead to visible loss of image quality. Use the "maximum" or "high" quality gradings.

To avoid errors, please observe the following:

Send all text to be used and associated files together. Attach a hard copy/print-out to the layout check. Ensure that no RGB colours are used in any files, including the associated files. For files from programmes not intended for the creation of printed documents (e.g. Word, Excel, Powerpoint), the files must always be converted. This means inevitable changes in data and considerable additional work, which we have to add to your invoice.

Safety & Security

Intrusion prevention and next generation firewalls

The small "bump-in-the-wire" EtherCatch series IPS device and the EtherFire series IPS firewall protect critical assets such as PCs and HMI at the edge of OT networks.

Real time visibility and controlled management

The Security Dashboard (SDC) software allows administrators to manage all IP systems from one location. The SDC can configure and monitor security policies, monitor network activity in real time, and audit performance policy, firmware and patch updates for the EtherCatch and EtherFire series.

Pattern-based virtual patching and intelligent threat protection

Pattern-based virtual patching significantly reduces a system's vulnerability to cyber threats. However, this remains a critical challenge in OT environments. Virtual patching techniques complement existing switch management processes by shielding against reconnaissance. Virtual patching acts as an operational emergency security tool that network administrators and operators can quickly deploy to remediate vulnerabilities in affected OT devices.

18. In addition to the Terms, the following clauses of the standard terms and conditions of the Interactive Advertising Bureau for Media Buys of Less than One Year ("**IAB Terms**") will apply to all Online Advertising services, with Wiley being the 'Media Company' and Customer being the 'Agency' and 'Advertiser' (unless the Customer is a media agency booking advertising on behalf of a customer in which case it will be the Agency, with its customer being the Advertiser):
